Software Developer Intern with hands-on experience in FastAPI, MySQL, SQLAlchemy, REST APIs, and Python backend development. Skilled in CRUD operations, database integration, authentication, and Streamlit-based applications. Passionate about building scalable backend systems and learning modern technologies.

Domain/Functional Areas

- Python Programming
- Backend Development
- Database Management
- FastAPI & SQL Integration

Key Skills

Programming & Backend: Python, FastAPI, REST APIs, SQLAlchemy, Pydantic, CRUD Operations

Database: MySQL, SQL Joins, Subqueries, Database Design Basics

Tools & Technologies: Git, Github, VS Code, Streamlit

Core Concepts: OOPS, File Handling, JSON, Modular Programming

Professional Experience

WeboApp Discovery Pvt Ltd

Panchkula

Software Developer Intern (Internship)

May 2026 - Present

- Developing backend applications and REST APIs using FastAPI and Python.
- Working with MySQL databases for storing and managing application data.
- Implementing CRUD operations and API routing for backend services.
- Using SQLAlchemy ORM for database connectivity and query handling.
- Applying Pydantic models for request validation and structured API responses.
- Exploring authentication systems and scalable backend architecture concepts.
- Assisting in debugging, testing, and improving application functionality.

Projects

Customer Management System - Backend Development

[Python / FastAPI / SQLAlchemy / MySQL]

May 2026 - Present

- Developed a customer management system for handling customer records efficiently.
- Built REST APIs using FastAPI for performing CRUD operations.
- Integrated MySQL database using SQLAlchemy ORM for database connectivity and query handling.
- Implemented functionalities for adding, updating, deleting, and retrieving customer data.
- Applied Pydantic models for request validation and structured API responses.
- Used modular programming and backend development concepts to improve application structure and maintainability.

Expense Tracker Application - Backend & Full Stack Development

[Python / MYSQL / FastAPI / Streamlit]

Apr 2026 - May 2026

- Developed an expense tracking application to manage and analyze daily expenses.
- Built REST APIs using FastAPI for handling expense records and data operations.
- Integrated MySQL database using Python MySQL Connector for storing and retrieving transaction data.
- Implemented CRUD functionalities for adding, updating, deleting, and viewing expenses.
- Created an interactive user interface using Streamlit for expense visualization and management.
- Implemented category-wise and date-wise expense tracking and analysis.

Certifications

- Python : Beginner to Advanced for Data Professionals - Codebasics**
Issued on: Dec 2025 [Certification Link](#)
- SQL for Data Science - Codebasics**
Issued on: Dec 2025 [Certification Link](#)

Education

Chandigarh University

Chandigarh

Bachelor of Engineering - Computer Science

Jun 2022 - Present
